

ABOUT AGU

American Graduate University was founded in 1976. The University offers a whole vehicle of education that operates outside the campus and classroom tradition. The University is uniquely qualified to offer courses and degree programs in the fields of acquisition management, contract management, project/program management, supply management, and general management. It has a well-defined and structured curriculum, an excellent faculty, an extensive proprietary collection of textbooks and course materials, an on-going dissemination research program, and the most complete library in the field.

UNIVERSITY WITHOUT WALLS

AGU is a true "university without walls" designed to make maximum use of efficient educational methods and technology. The University's use of a structured curriculum and educational technology, tied in directly with the co-curricular effect of the student's day-to-day activities, provides a cost-effective route to formal higher education on a national scale. The University's blend of text and web-based technology is designed to duplicate the real business atmosphere for its adult student body.

ROLLING ADMISSIONS

AGU's rolling admissions policy means you've never missed an opportunity to begin your studies toward earning your graduate degree. Visit www.agu.edu for admissions requirements, prerequisites and to apply online.

Limited budget
or worried about the time
commitment?

At AGU, you can also earn a Master’s Certificate in:
Management * Acquisition and Contracting *
Project and Program Management * Financial Management
and Pricing * Supply Chain Management
— by completing just six courses. You can then decide
if you’re ready to move on to a full MBA or
Master’s degree program.

SINCE 1976, AGU has offered thousands of working professionals with an affordable, convenient educational option for earning a master’s degree from any location in the world.

In addition to the MBA programs, AGU offers several choices for improving your earning power with accredited distance learning degrees for working professionals, including:

- Master of Contract Management (MCM)
- Master of Project Management (MPM)
- Master of Acquisition Management (MAM)
- Master of Supply Management (MSM)
